## GROSSKOMMENTAR AktG ONLINE

[Commentary on the German Stock Corporation Act Online]

This online resource provides the most complete and comprehensive commentary on the German Stock Corporation Act (AktG) available in the German language. Its strong reputation is based on a combination of academically rigorous and practice-oriented commentary, written by renowned authors and contributors from both active legal practice and academia. The work thus provides legal scholars and practitioners with answers to nearly all questions related to corporate law. Unparalleled in its comprehensiveness, it sheds light even on seemingly obscure issues.

As the European Union is exerting ever greater influence over corporate and capital market law, the work also gives due consideration to the European context.

The online version provides readers with all volumes of the current edition published so far, and contains links to cited decisions and norms. Advanced search features (via full text, keywords, headings and decisions) ease access to the entire work. Moreover, several updates per year keep the commentary cutting-edge – even between the editions.

- ▶ The most comprehensive commentary available on the German Stock Corporation Act (AktG)
- ▶ The latest edition of the work
