ENHANCED ELECTRONIC GRAMMARS ONLINE

An Advanced Research Tool for Linguists

Enhanced Electronic Grammars (EEG) features comprehensive descriptions of languages from around the world. Through this unique Online Reference Work, full grammars are made available together in an interlinked and semantically-annotated format, allowing granular access to the grammatical data and enabling cross-language research of several grammars at the same time. In addition to cross-linguistic queries, each grammar can also be read and researched individually.

Enhanced Electronic Grammars is updated biannually, integrating several new grammar publications each year for even more extensive cross-linguistic research.

The following languages are currently available in EEG:

Aguaruna (Iiniá Chicham), Alto Perené, Bardi, Basque, Berbice Dutch, Bunan, Cavineña, Daakaka, Domari, Emai, Eton, Goemai, Hinuq, Hup, Jamsay, Kolyma Yukaghir, Kulina, Lao, Lavukaleve, Madurese, Mani, Mapuche, Mian, Mina, Mongsen Ao, Neverver, Qiang, Saramaccan Creole, Savosavo, Siraya, Teiwa, Tommo So, Toqabaqita, Vaeakau-Taumako.

- ▶ A sophisticated Online Reference Work specially designed for the needs of general linguists and typologists
- ▶ Enables simultaneous search across dozens of languages on hundreds of linguistic phenomena
- ▶ Makes complex multiple searches possible
- ▶ Each linguistic phenomenon is illustrated by naturalistic examples with interlinear glossing and free translations
- ▶ Focus on small and endangered languages stimulates new insights on human language
- ▶ Non-restrictive DRM – allows for an unlimited number of simultaneous users campus/institution-wide

“Grammars of endangered and little described languages are the life-blood of linguistics. The **Enhanced Electronic Grammars** database for the first time allows linguists to gather data from the best available grammatical descriptions of a wide range of the world’s languages, including data that is challenging for approaches based on only more widely spoken languages.”

Bernard Comrie

Director, Department of Linguistics

Max Planck Institute for Evolutionary Anthropology
