## GERMANISTIK ONLINE

Internationales Referatenorgan mit bibliographischen Hinweisen  
 seit 1960

[Germanistik Online Database: International Journal of Papers  
 with Bibliographical References]

*Germanistik*, the leading international publication covering German Language and Literary Studies, is now also available as an online database. Thus, more than 50 years of German philology are searchable electronically. The history of the discipline – critically reviewed, systematized and keyworded – is accessible online in more than 60,000 abstracts and summaries.

Altogether, approximately 350,000 monographic studies, collected volumes and journals from the areas of literature, theatre studies, media studies, cultural history and linguistics are made accessible bibliographically.

The database will be continually expanded to include the current volume containing about 8,000 new entries. It provides a category-specific, full-text and detailed search and differentiated and convenient access to authors, editors, article and review writers, titles, papers, publication years and keywords. All relevant data are cross-linked. The online edition provides access to extensive factual coverage for every entered title with information on the content of the respective book or article.

- ▶ More than 50 years of bibliographical information and history of German Language and Literary Studies online
- ▶ 350,000 entries going back to the first issue
- ▶ Annual update with 8,000 new entries
- ▶ State-of-the-art classification
- ▶ Non-restrictive DRM – allows for an unlimited number of simultaneous users campus/institution-wide
